Addendum #1 Security Camera Server 2/14/19

In regards to the above mentioned solicitation, would you be able to provide answers to the questions below:

1. Are all the cameras being used the exact same? Can we get me the camera part numbers?

   Answer: The cameras are not being used the same.

2. Since you are planning to expand in the future to a higher FPS and resolution, can we go ahead and calculate for the future standards now in order to ensure our solution will be able to handle future growth.

   Answer: Refer to spec sheet

3. Are you planning to record based on motion? If so, what percentage of the day are you planning to record?

   Answer: Motion, Scene activity is high or Active, Recording schedule is 80%

4. We do not sell licenses. Those will have to be purchased through the camera manufacturer.

   Answer: You would have to get the licenses for us.

5. For the Client Stations, are you planning on viewing in 1080P or 4K? How many tiles per monitor? we will calculate for 6 monitors.

   Answer: Client Stations, if you mean a view station we only have one with four tiles but would like to expand to 6 1080p. There would be at least 22 Ocularis clients on induvial computers.

6. Although we are a Milestone gold-level certified partner, we have no official certification with ONSSI. Would we need to be certified by ONSSI to be considered for this project?

   Answer: You have to be a certified ONSSI dealer.

7. Would we be able to subcontract the installation of the server and the cameras to a certified and insured local installation company in VA so that we can remotely migrate your VMS to Ocularis Enterprise?

   Answer: We would prefer not to.

8. Can you send me an aerial satellite view screenshot of your SEGA lot so that I can prepare a camera design map for you to show what you can expect to see and in what level of detail?

   Answer: See Attachment #2

9. Is this project federally funded, or are any brands of cameras restricted from being offered?

Answer: No, and cameras must be compatible with ONSSI.

10. Please describe the lighting at nighttime. Is it pitch black, well-lit, or is there ambient lighting?

    Answer: See attachment #2

11. Lastly, will someone on your staff (such as a security officer or IT admin) be setting up the Ocularis software by adding users to the system, setting user permissions, configuring recording settings, etc., or is this something we should add to our bid price? If it's something we should add, then how many users are there?

    Answer: Yes, someone on our staff will be assisting the bidder in setting up the system. So yes they should include those services in the bid. We anticipate 20 users.

Also, can you please respond to the items highlighted in yellow below: (See Addendum #1 Attachment #1 document)

1. VMS:OnSSI
2. Camera count: 50
3. Resolution: 5MP
4. Compression: H.264 HighQual
5. FPS: 10
6. Scene Activity: (Infrequent, Moderate, Busy, Active, or Constant)
7. Retention Days: 30
8. Recording Schedule: (Motion % or Constant)
9. Client Station: xView Professional Plus
10. Tiles per monitor: ?
11. Client Viewing: 1080P or 4K?
