

PUBLIC NOTICE

Contractor Information Meeting & Workshop

Charlottesville-Albemarle Airport
Runway 3-21 Rehabilitation

Charlottesville-Albemarle Airport Authority will be holding a public information workshop for contractors and potential bidders at the following time & location:

- Date:** Thursday, December 10, 2015 - 10:00 AM
- Location:** Administrative Conference Room – Second Floor
Charlottesville-Albemarle Airport
100 Bowen Loop, Charlottesville, Virginia, 22911
- Directions:** Park in lot in front of air carrier terminal building. Conference room is on second floor of terminal building, inside secure area. Attendees should meet in the main terminal building atrium, where escorts will be available. Late arrivals may call admin office by using phone located in main entrance lobby.

This meeting will provide interested construction contractors with preliminary design information and an opportunity, in an open forum, to discuss project phasing, construction constraints, sequencing, and bid package scopes. The meeting will conclude with a site visit.

The project is a major rehabilitation project of the airport's only runway and their entire parallel taxiway system. It will include significant sequencing challenges and constraints - both night work and full weekend closures are being considered. The scope generally includes:

- 50,000 tons of P-401 asphalt
- 100,000 linear feet of crack repair
- 10,000 square yards of pavement reconstruction
- Runway and taxiway lighting and signage adjustments
- RW 3 MALSRS adjustments
- Minor infield grading and drainage modifications

The project is schedule to bid in late Spring 2016.

Contractors and suppliers are encouraged to attend the meeting to become familiar with the project scope, schedule, and sequencing; provide general comments on the design and materials; and ask questions about the project. Advance copies of handouts and sketches will be made available upon submittal of the attached Advance Handout Request Form.

Questions regarding the project or meeting may be directed to Susan Winslow, Delta Airport Consultants, at (804) 275-8301.
